

Amendment to the Multi Party Agreement of the DFRS Ecosystem

WHEREAS:

Following discussions in the General Assembly of the DFRS Ecosystem of 27 March 2025, the members of DFRS agreed to finetune and update the Multi Party Agreement ("MPA") to provide a stable corridor and effective way forward for all parties involved.

The MPA defines a Creator as a Party that uses Data (L2), Data (L2') and/or Data (L3) fully or partly received through the SRTI Ecosystem to create Data (L3).

The members agreed to amend article 4.7 of the MPA to make clear that in order to comply with the reciprocity principle, the Creator is also allowed to share L2 and/or L2' Data under its control from outside the DFRS ecosystem.

The members also wanted to ensure continuity of the working relationships and the MPA by extending the validity of the MPA until the end of 2029.

THE FOLLOWING HAS BEEN AGREED UPON:

1. Article 4.7 is replaced by the following provisions:

"A Creator shall provide to all requesting Parties, Data (L3) that is created on the basis of Data (L2), Data (L2') or Data (L3) that is acquired through the SRTI Ecosystem. Alternatively, a Creator shall share Data (L2 or L2') from other sources that are under their control."

2. Article 15.1 is replaced by the following provisions:

"This Agreement enters into force on the November 1, 2020 and will remain in force until 31 December 2029. Following the expiration of its initial term, the Agreement shall continue in force and effect from year to year with those Parties that specifically approve such continuance at least annually."
